

# MYSTICAL MEDIA Productions

Mystical Media is a filmmaking team all about making cutting-edge cool indie films. We also offer creative services like Video and DVD work, Music Videos, Talent Management, Web Design, Photography, Writing, Logo Creation, and Fight Choreography.

There is something very special about independent filmmaking, a sort of intimacy you do not feel with big studio films. This reality touch often can make such a film unique and very entertaining. As filmmakers we enjoy the thrill of creating such a fictional world. This vision is what motivates us. With great imagination and the use of the Internet, the magic wand of the 21st century we communicate with all that have a love for film, fashion and music. We truly have a strong outlook and lots of creativity flowing in our veins. The time has come to let the modern-day wizards of Mystical Media help you imagine the magic!
